

Trading Performance Evidence Report

Closed-trade ledger review with drawdown, concentration, and risk checks

Trades 180 Closed ledger rows	Net PnL USD -314.44 After costs in ledger	Max DD USD -537.89 Worst equity decline	Sharpe -0.82 Risk-adjusted return
--	--	--	--

Executive Read

This report reviews a closed-trade ledger. It is evidence, not a trading signal. The goal is to make performance, concentration, drawdown, and data-quality risks visible before a strategy is marketed or scaled. No result here guarantees future profit. The report is designed to surface overfitting, missing costs, and symbol concentration instead of hiding them behind a single equity curve.

Core Metrics

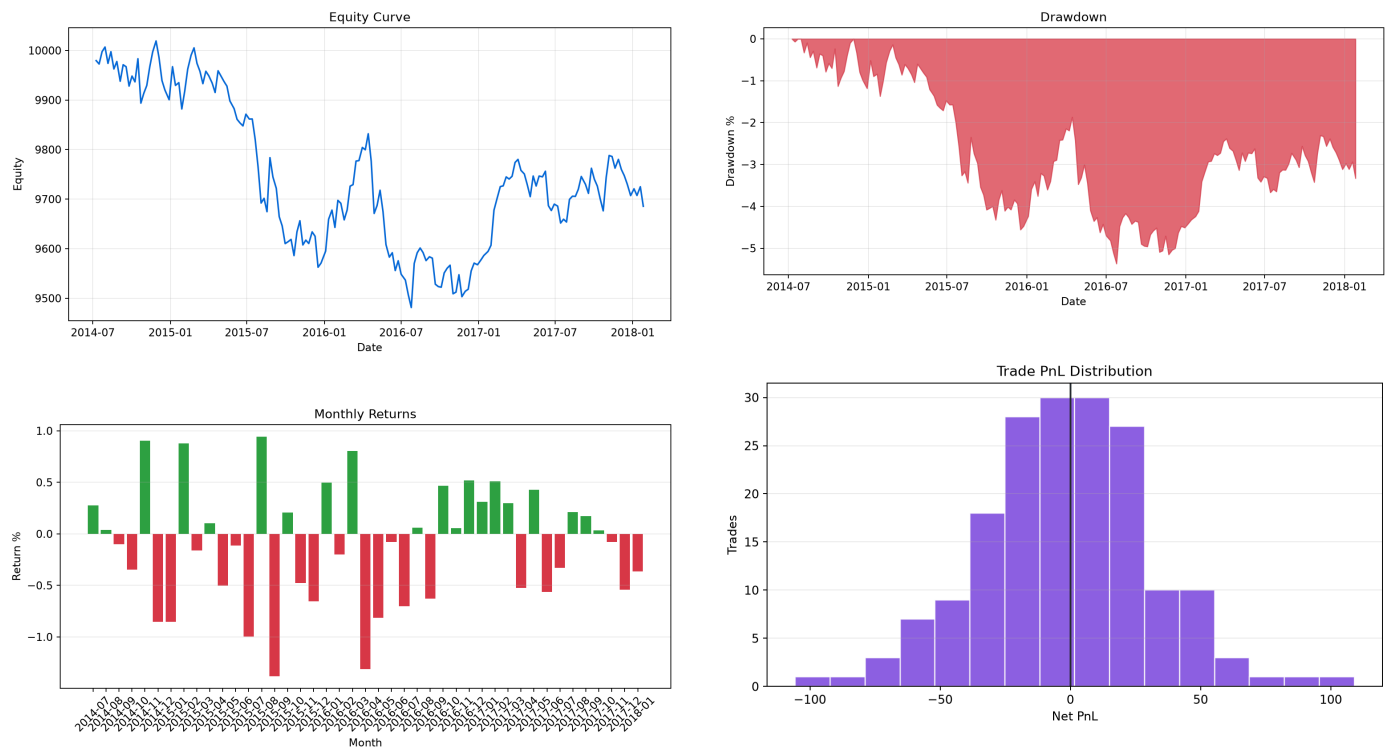

Metric	Value
Total trades	180
Net PnL	USD -314.44
Return	-3.14%
Win rate	47.78%
Profit factor	0.87
Expectancy	USD -1.75
Average win	USD 24.81
Average loss	USD -26.04
Payoff ratio	0.95
Max drawdown	USD -537.89
Max drawdown pct	-5.37%
Sharpe ratio	-0.82
Best trade	USD 109.03
Worst trade	USD -105.62

Evidence Checklist

check	status	evidence
closed_trade_timestamps	pass	All exit timestamps are on or after entry timestamps.
minimum_trade_count	pass	180 trades; configured minimum is 30.
fee_coverage	pass	100.0% of trades include non-zero fees.
symbol_concentration	review	Top symbol AAPL is 100.0% of trades; limit is 50.0%.
exit_time_order	pass	Ledger is sorted by exit timestamp.

check	status	evidence
lookahead_boundary	pass	The report summarizes closed trades only and does not train a predictive model; use at least 1 day(s) of embargo for any future...
survivorship_bias	review	1 symbol(s) present. Confirm the source universe includes delisted or failed names when evaluating broad strategies.
multiple_testing	review	If this strategy was selected after many variants, report candidate count and walk-forward results before treating the performa...

Limitations

Backtest and trade-log performance can be affected by fees, slippage, survivorship bias, missing trades, overfitting, and market regime changes. A strong report should make those risks visible instead of hiding them.
