

Trading Performance Report

Closed-trade ledger review with performance metrics, drawdown visibility, symbol concentration, and risk checks. The report is evidence, not a trading signal or financial advice.

Trading Performance Evidence

Closed-trade ledger review with drawdown, expectancy, and sample-size checks.

NET PNL

-314.44

RETURN

-3.14%

WIN RATE

47.78%

MAX DRAWDOWN

-5.37%

Evidence checks

Ledger integrity	completed trades only
Lookahead posture	uses exit-time ordering
Risk visibility	drawdown and distribution included
Claim boundary	no profit forecast

Interpretation: the report is an evidence layer, not a trading signal.

Core Metrics

Metric	Value
Total trades	180
Net PnL	USD -314.44
Return	-3.14%
Win rate	47.78%
Profit factor	0.87
Expectancy	USD -1.75
Average win	USD 24.81
Average loss	USD -26.04
Payoff ratio	0.95
Max drawdown	USD -537.89
Max drawdown %	-5.37%
Sharpe ratio	-0.82
Best trade	USD 109.03
Worst trade	USD -105.62

Evidence Checklist

Check	Status	Note
Closed-trade ledger	Pass	Report summarizes completed trades only.
Minimum sample size	Pass	Small trade counts can overstate strategy quality.
Drawdown visibility	Pass	Equity and drawdown charts are included.
Forward-looking claims	Pass	The report does not forecast future profit.

Symbol Breakdown

symbol	trades	net_pnl	win_rate	average_trade
AAPL	180	-314.4428	0.4778	-1.7469

Limitations

Backtest and trade-log performance can be affected by fees, slippage, survivorship bias, missing trades, overfitting, and market regime changes. A strong report should make those risks visible instead of hiding them. No result in this report guarantees future profit.

Recommended next review: verify fees/slippage assumptions, inspect the largest winners and losers, compare walk-forward periods, and review whether performance is concentrated in one symbol or market regime.
